profile

Passionate Full-Stack Web Developer with a strong foundation in MERN Stack (MongoDB, Express.js, React.js, Node.js). Focused on building user-friendly, responsive, and performance-optimized web applications. Quick learner with a problem-solving mindset, committed to continuous learning, skill development, and delivering real-world projects. Seeking an opportunity to contribute my skills and grow as a professional software engineer in a challenging environment.

Education

ILM college of arts and science - **Bachelor of Computer Application** 2021 – 2024
Completed a college group project, applying technical and problem-solving skills in a collaborative environment.

EXPERIENCE

Brototype 2024 – Present

- Learning and building full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN Stack).
- Developed multiple responsive web pages and dynamic projects focusing on real-world problem-solving.
- Practiced REST API development, user authentication, and CRUD operations with proper backend integration.
- Worked on small project modules like login systems, admin dashboards, and user management.
- Applied Git & GitHub for version control and collaborative development.
- Continuously improving problem-solving skills through daily coding practice on platforms like LeetCode.
- Building portfolio projects to demonstrate clean code, optimized performance, and responsive UI/UX design.

Skills

Programming & Frameworks

- JavaScript, Node.js, Express.js, React.js, Bootstrap

Databases & Cloud

- MongoDB, SQL (Basics)

API Development & Testing

- REST API, Postman, CRUD Operations, Authentication (JWT, bcrypt)

Tools & Technologies

- Git, GitHub, VS Code, Figma (UI Design), Responsive Design

Deployment & Hosting

Problem Solving

- Data Structures & Algorithms (LeetCode Practice)
- Logical Thinking & Clean Code Writing

PROJECTS

Cutee Paws — Multi-Vendor E-commerce Platform for Dog Product Sales
Tech Stack: MongoDB, Express.js, React.js, Node.js, Razorpay, AWS

- Developed an E-commerce web application focused on buying and selling dog products like food, toys, grooming items, and accessories.
- Implemented secure OTP-based authentication and role-based access control for users and admins.
- Integrated Razorpay payment gateway for secure and smooth transactions.
- Designed wallet and referral systems to boost user engagement and retention.
- Developed advanced search, filters, and product management features for enhanced user experience.
- Built clean RESTful APIs to manage products, orders, payments, and user profiles efficiently.
- Deployed the application on AWS for scalability, reliability, and better performance.

MINIPROJECTS

- ***Tesla Website Clone*** — Developed a responsive Tesla landing page using HTML, CSS, and JavaScript focusing on UI/UX and animations.
- ***Cetaphil website Clone*** — Created a skincare product website clone using HTML, CSS for layout and styling.
- ***Apple Website Clone with Bootstrap*** — Built an Apple website front page clone using Bootstrap for responsive design and component reusability.
- ***Stone Paper Scissors Game*** — Designed and developed a small interactive game using HTML, CSS, and JavaScript with dynamic user interaction.
